EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- Change the title to, "Image Processing Device For Image Region Discrimination"

Allowable Subject Matter

2. Claims 1, 3-4 and 6-20 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The closest cited prior art (USPN 6,052,484 to Kobayashi) fails to teach or suggest the feature of comparing a value S corresponding to a sum of a total density difference of two sub mask pixel groups in a main scanning direction and a total density difference of two sub mask pixel groups in a sub scanning direction with a threshold value, the sub mask pixel groups being provided in a main pixel group constituted by a plurality of pixels including a target pixel, and determining whether or not the target pixel is an edge area based on this comparison as is recited by independent claim 1. It follows that claims 3-4 and 6-20 are also allowable for the reasons stated above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Mutoh et al (USPN 6,631,210) discloses performing image region discrimination of a target pixel in a pixel mask using sum of density difference operations.
